

Atlas Research - Sample Project Notes

Fictional practice document for testing document Q&A.

Project overview

Atlas Research helps a small team search internal documents.

The project manager is Maya Chen.

The planned launch date is November 20, 2026.

Team and schedule

Ava Patel owns document ingestion.

Ravi Shah owns retrieval evaluations.

The weekly project review is Tuesday at 2 PM.

Release requirements

The first release must support text documents and PDFs.

Every generated answer must include source references.

The evaluation dataset must contain at least 50 questions.

The team must manually review unsupported answers.

Budget and storage

The monthly cloud services budget is zero dollars.

The initial application runs locally on a laptop.

Documents are stored in a local SQLite database.

Known limitations

Scanned PDFs require OCR before text retrieval.

Citation checks verify source IDs, not factual correctness.
